

MIONIX™

LIGHT-YEARS AHEAD OF THE GAME - MIONIX.NET

NAOS 5000

Product Story

This prominent gaming mouse is named after the star Naos, a blue super giant and one of the brightest stars in our galaxy. Naos means "ship" and is enough powerful to create comet tails and huge clouds of auroras visible from Earth. Naos is constantly moving away from its original position in the constellation of Vela and it spins about 100 times faster than our sun. Since its birth it has covered a distance of 400 light-years. No one knows exactly why Naos has such a high rotation speed, but an explanation to this phenomenon lies in the gravitational interaction between many other stars.

Product Overview

A passionate hunt for perfection has come to an end. Mionix Naos 5000 has seen its first light of day. Get ready to meet a gaming mouse with an incredible ergonomic comfort and stunning technology that offers an outstanding gaming experience. Mionix Naos 5000 features a new innovative weight tuning system for an optimal weight distribution of the mouse, carefully selected high-end components and leading laser technology. Stunning features such as adjustable lift-distance, 5 onboard profiles, extensive macro settings and customizable LED-lights give you the opportunity to customize the mouse exactly to your liking.

Unique Features

- Truly ergonomic design
- Balanced weight tuning system
- 5040 dpi laser sensor
- 128kb onboard memory
- Customizable LED light system
- S.Q.A.T - Surface Quality Analyzer Tool
- 3 steps customizable dpi in-game adjustment
- 7 programmable buttons
- Adjustable polling rate
- Plug n Play

Technical Specification

General

Truly ergonomic design
 Grip friendly rubber coating
 7 buttons (7 programmable)
 3 steps in-game dpi adjustment
 Configurable dpi up to 5040 dpi
 6 integrated LEDs
 Adjustable polling rate
 Large teflon feets
 Balanced weight tuning system (up to 40 gr)
 Netto Weight: 106 gr
 Full speed USB 2.0 with Plug n Play
 Cable length: 2 m (braided for durability)

Laser

5040 dpi gaming laser sensor
 S.Q.A.T - Surface Quality Analyzer Tool
 Adjustable lift distance
 1 ms response time
 12 000 frames/sec
 Tracking speed: 5.1 m/sec (200 ips)
 10.6 megapixels/sec image processing
 Acceleration: 30 g
 40 000 Hz sampling rate
 True 16-bit data path

System Requirements

Windows - PC
 Available USB port
 20 mb free space on harddrive for driver
